Summary

Detail-oriented Full Stack Web Developer, applying knowledge and skills to build interactive web applications. Educated at the University of California, Los Angeles continuing education program in Full Stack Web Development. Strengths in meeting deadlines, learning fast and working as a solo player or as a team player as I have collaborated to develop the Wizardry app. Passionate about developing apps that look appealing and are easy to interact with. Enjoy incorporating dynamic and useful features to websites. Interested in developing impactful web applications that can make life easier for the user.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript
Databases: MongoDB, Mysql, and Firebase
Technologies: Node.js, Express.js, Axios
Libraries: JQuery, React.js, Bootstrap, Materialize, React-Bootstrap
Applications: Wizardry, Train-Time-Update, and Cristal-Guess-Game

PROJECTS

Wizardry | Link to GitHub: https://github.com/wonjin9181/Wizardry
Link to Deployed Project: https://wizard-game.herokuapp.com/createuser

- Wizardry is a browser game where wizards can cast spells to get points and defeat monsters. The game was built using React.js Mysql, Express, and axios.
- Group project, responsible for the aesthetics; changing the backgrounds depending on the state of the house, used CSS and React-Bootstrap for the different effects and layouts in all the pages.

Train-Time-Update | Link to GitHub: https://github.com/lidiabara7/Train-Time-Update
Link to Deployed Project: https://lidiabara7.github.io/Train-Time-Update/

- This app was designed to calculate the next arrival time of any given train. The user only needs to enter the name, destination, first train time and the frequency in minutes. The app will return the next arrival time and the minutes away.
- Full Stack Web Developer
- Built with HTML, CSS, Javascript, and Firebase

Cristal-Guess-Game | Link to GitHub: https://github.com/lidiabara7/Cristal-Guess-Game
Link to Deployed Project: https://lidiabara7.github.io/Cristal-Guess-Game/
- In this game there is a target number that the user needs to match. There are four crystals that have a hidden different value. The user needs to click on the crystals to match the different values.
- Full Stack Web Developer
- Built with HTML, CSS, and JavaScript

EXPERIENCE

Parking attendant   Jan 2018 – present
Parking Network   Northridge CA 91325
- Answered customers' questions regarding parking, directed traffic, and coordinated the shuttle service
